idealpos 7

Idealpos is exactly that, an ideal Point of Sale solution for your business. Supporting many different industry types including bars, cafes and restaurants, through to retail, hotels, dry cleaning and more, you can be confident that we will be able to handle your business in any situation.

If you sell items or services to customers, you want an ideal pos system to handle that. Idealpos can cater for your business requirements based on their over 30 years' experience in the industry. Integrating with leading third-party software and hardware vendors, Idealpos has the solutions to help your business reach the goals you set out to achieve.

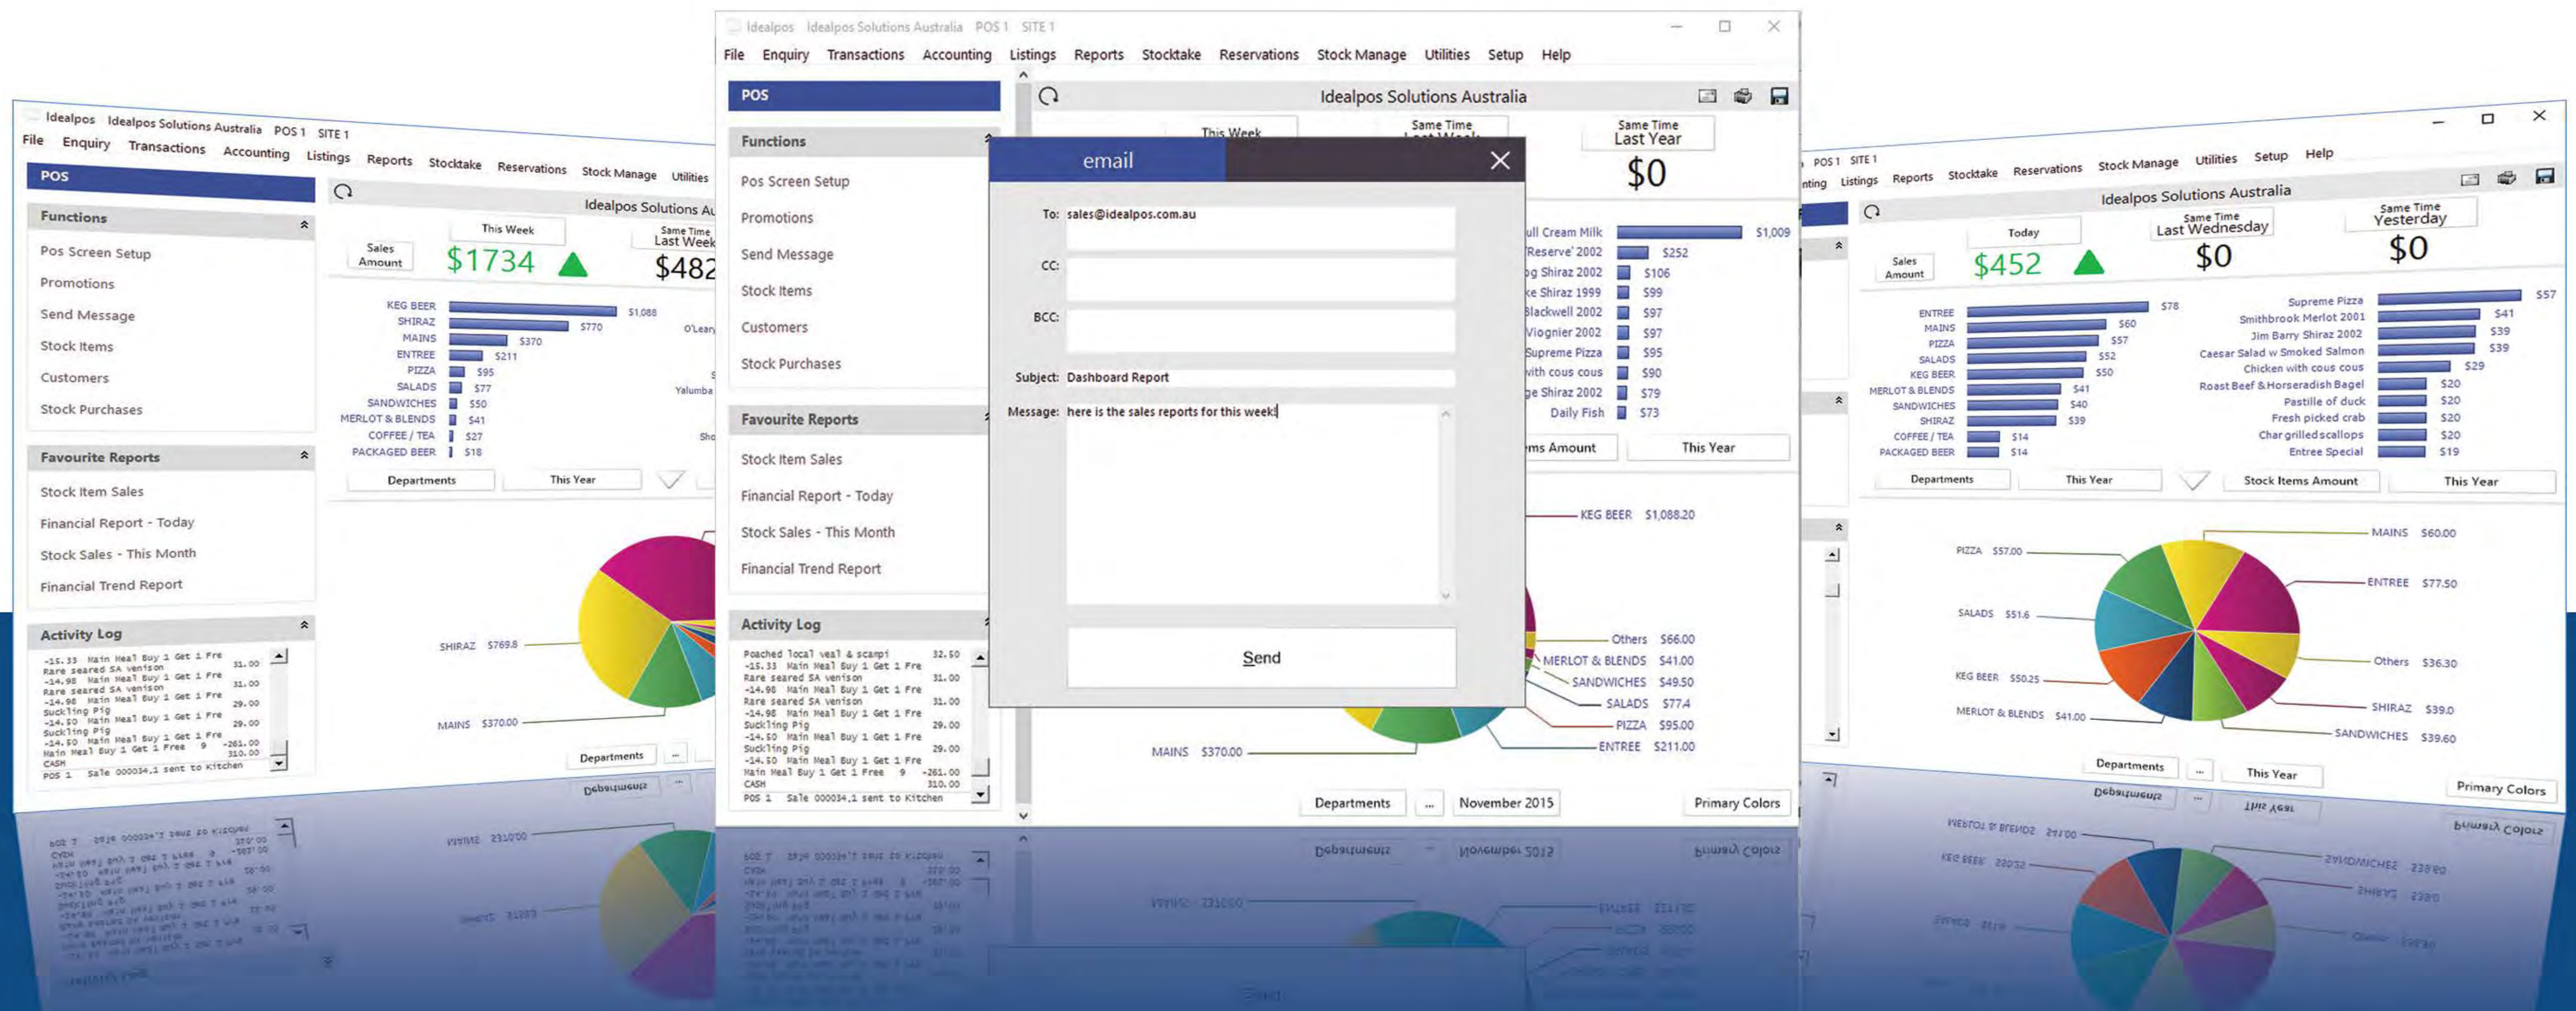

ADOPTED TECHNOLOGIES

Microsoft Windows 10 32/64bit Compatible
SQL Server 2008 R2 Express Database with 10GB Capacity
Multi-Terminal LAN and WAN Network Capability
Intuitive and Fast User Interface
Various 3rd Party Integrations

DASHBOARD

The dashboard has been redesigned to display more data and allow you to easily view information at a moment glance. When using Idealpos on a larger screen monitor in the office, more information can be displayed.

STOCK CONTROL

Stock Takes can be done entered via stock-take forms or with a scanning device by Linea Pro which is compatible with iPhone and iPod Touch. Stock Manage links directly to Idealpos and transfers data in a matter of seconds, allowing you to get on with the job you need to do.

REPORTS

Where applicable, each report will have a Date Range to select from, along with other fields that help drill the report down to the information you require. Sessions will also be displayed in this range, and will only display when the session has been allocated a time frame.

Each report has the ability to be Printed, Exported, Save as PDF or Emailed. A number of reports have an option to set the selections as Default. All reports are able to be configured as a shortcut, and can also be used in the Scheduled Reports feature, or uploaded online for use within Web Reporting

Report Categories: Financial, Sales, Stock Control, Purchases, Customers and Employees.

PROMOTIONS

Promotions are a great way to bundle products together for a quick sale, or to showcase a new product and make it a standard purchase with your regular customers.

Idealpos allows you to create many different types of promotions so you can sell your products the best way you know how.

TABLE MANAGEMENT

The Idealpos 7 Restaurant features provides a graphical user interface to view at a glance the status of all tables within the establishment. The table map is completely customizable and can facilitate the configuration of many different functions. Each colour represents a different status for the table, which can be custom designed to each install.

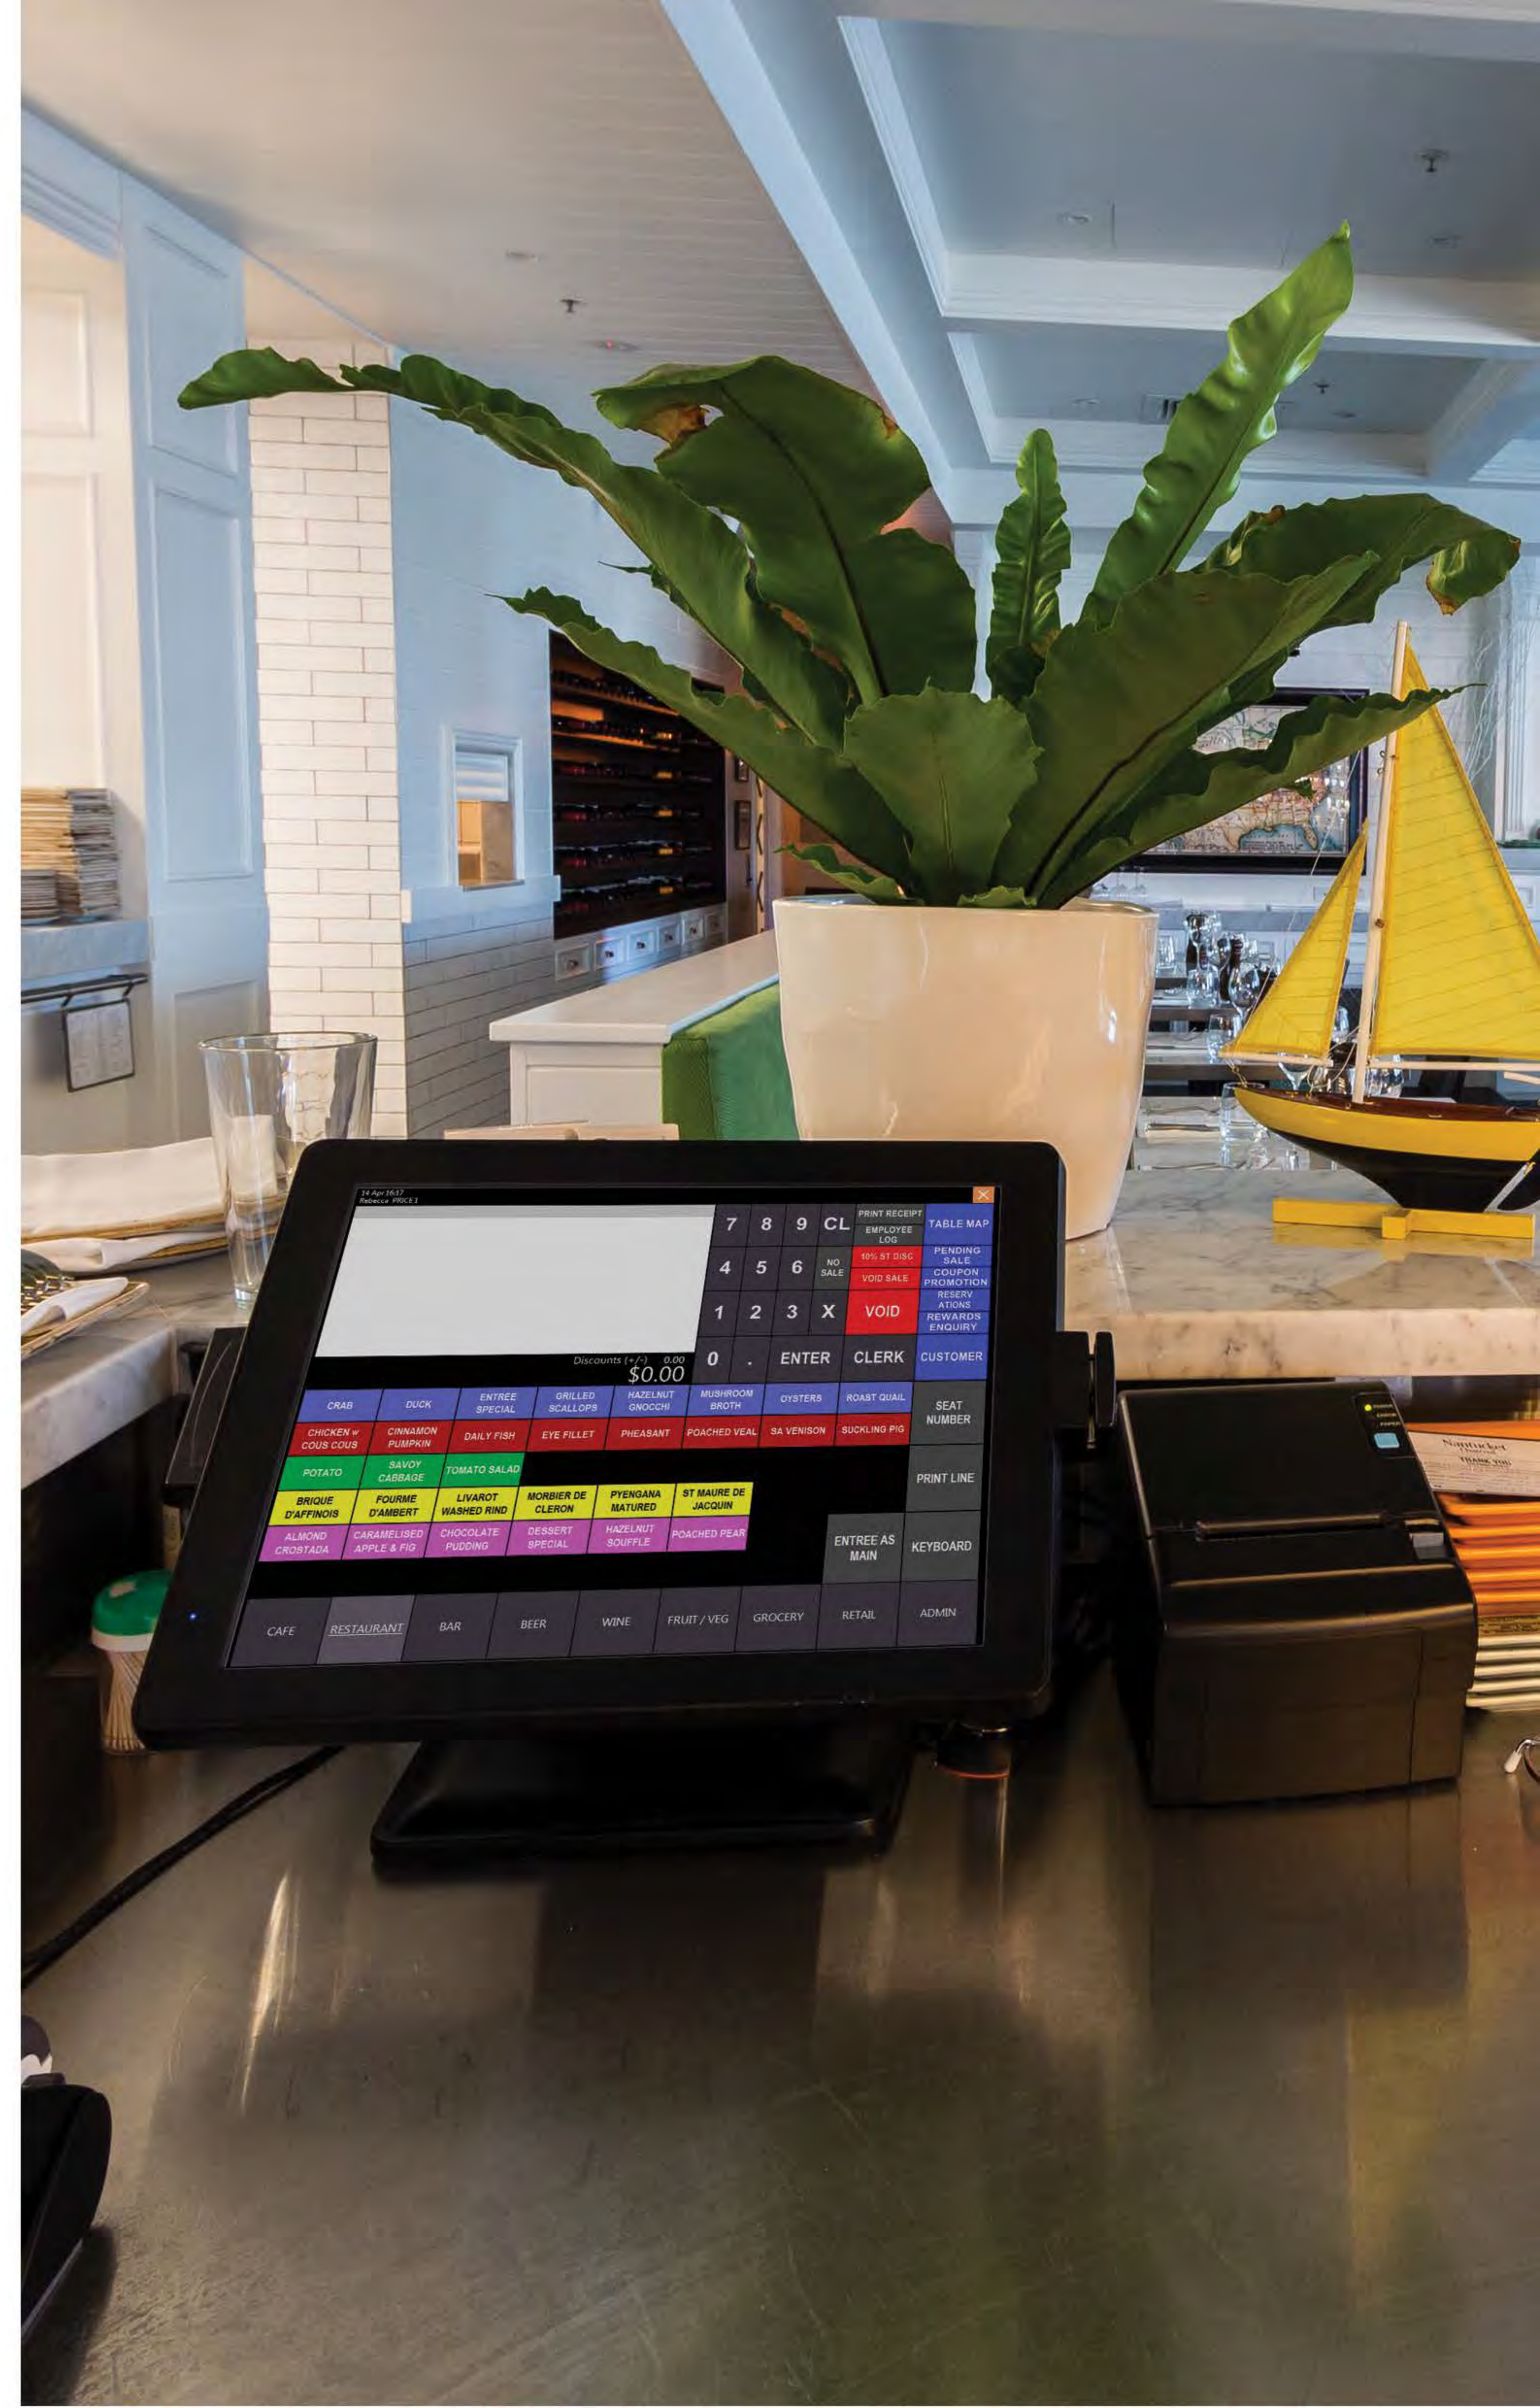

With the Idealpos Table Map System, you can Bill Print and split Bill by Seat, Transfer Tables, View a Summary of all Tables within the Restaurant, Enter orders using Seat numbers, Access Reservations, Make Tables Inactive, Modify the Table Map and join tables together during service, Set alert time for bill printed and not paid, and guest seated but not ordered, Enter the number of guest, and produce reports based on average food and beverage spends by guest and much more.

IDEAL HANDHELD APP

To help make the most of your service times and staff efficiency, Idealpos has a mobile app that allows staff to take orders on a compatible iPhone or iPad. The app has been available for some time using version 6, but with the release of version 7 there are some additional features.

Table status indicators will display on the app itself, so the staff no longer need to be near a POS terminal to see how each table is travelling. It is also easier to build items in the app itself using the tabs and grids that are already programmed into so many databases instead of needing to use menus.

ACCOUNTING INTEGRATION

Idealpos 7 has been closely integrated with MYOB and Xero, two leading Accounting Software Solutions.

In both instances you will be able to End the Sales Period of multiple terminals across all sites.

Financial figures can be sent to accounting once balanced, thus ensuring that your accounting software is kept accurate.

Supplier Invoices can also be sent to the accounting software where the detail of the invoice can be entered into Idealpos without having to match product codes in your accounting software.
